

Dear Parent/Guardian:

Recently your child learned about ways to stay safe when not with you through the national child safety education program KinderVision®. KinderVision® was created as a result of work the founder did on behalf of a child victim. His desire was to prevent such tragedies from happening to other children. The philosophy behind KinderVision® is the belief that children are safer when they receive instruction which is reinforced at home and at school to raise their awareness.

KinderVision® uses activity/coloring sheets and a ten minute video narrated by law enforcement and an eight year old little girl to introduce children to the information they need to know to stay safe. However, for a child's response to be immediate, the material must be reinforced through interaction and repetition.

**Please take your children to [www.TheGreatestSave.org](http://www.TheGreatestSave.org) to see what they know and you know about personal safety - and what you need to role play and reinforce at home. You are your child's first line of defense**

Additional safety information including material about the internet, teens, and the location of predators in your neighborhood can be found on the KinderVision® website at [www.TheGreatestSave.org](http://www.TheGreatestSave.org). We are continuously striving to create a safer world for children. Our children are our most precious blessing. Protecting them is our most significant responsibility.

Very truly yours,

Your Child's Teacher
